

## There is an easier way to display your valuables in safety

**ONE**Time™  
Security Locking System

ONE-TIME™ is anti-theft packaging with multiple applications including but not limited to optical media, flash memory, video games and software, batteries, razorblades, inkjet cartridges, personal care and more. By reducing reliance on security application at store, ONE-TIME™ packaged products are accelerated from door to floor, merchandised live and in greater volumes. Whilst reducing shrinkage, ONE-TIME™ increases sales and promotes impulse buy opportunities. Consumers can also enjoy the convenience of self-service and upon sale products are unlocked in a single swipe through the Decoupler. **Why wait any longer to switch to maximum security with maximum convenience?**

Security Locking System

### What is ONE-TIME™ ?

ONE-TIME™ packaging is able to be locked and EAS source tagged at point of manufacture. When ONE-TIME™ packaged product arrives at retail it is already secured and ready for immediate safe and live display. Upon sale, products are unlocked in a single swipe through the ONE-TIME™ Decoupler at checkout. ONE-TIME™ accelerates door to floor merchandising, enabling stock to be displayed faster, with confidence and in greater volumes to the benefit of both the vendor and retailer.

### ONE-TIME™ Benefits:

#### To Vendor:

- Accelerates merchandising
- Improves retailer confidence to display product
- Increases volume of product on display due to small footprint
- Increases consumer accessibility to product
- Proven to increase sales and promote impulse buy opportunities
- Opens new and wider channels of distribution

#### To Retailer:

- Products arrive pre-locked and EAS tagged ready for immediate live display
- Eliminates bottleneck created by security processing at store
- Promotes self-service
- Reduces dependence on locked cabinets and dummy packaging
- Reduces capital expenditure on security devices and fixtures
- Increases confidence for non-traditional placement of product in store
- Disguises EAS tag inside pack to prevent tampering, damage or tag removal
- Reduces shrinkage and shelf-sweeping
- User friendly and efficient at Point of Sale
- Proven to increase sales and promote impulse buy opportunities

#### No Limits to ONE-TIME™ Applications:

- Any product with high volume and perceived risk to theft
- Multiple applications include but not limited to optical media, flash memory video games and software, batteries, razorblades, inkjet cartridges, personal care and more

### ONE-TIME™ Features:

- Double overlapping walls and reinforced periphery
- Integrated internal lock
- EAS source tag concealed inside the pack
